## This Is How Humanity Is an Infinity Unfolding Itself

The properties of humans are together referred as humanity and God's properties are simply referred as divinity. Divinity can only be experienced through the expressions of it, that can be found in 01: Humanity: Shown by humans; 02: Hemmanity: Shown by animals; 03: Naturium: Shown in the natural things; 04: Rosasensedium: Seen expressed in the awe-inspiring natural worlds of plants and the natural vegetation, as well as, in the geological and seismic worlds; 05: Isabelium: In all the beautiful, magnanimous and sublime expositions of beauty, that the Universe has to offer, together and in singular instances, that we celebrate in music, arts and human tongues and 06: The Mechanoprincipium: Expressed in the astonishing wonders of their mechanisms, processes, systems, structures, architectures, geology, seismology, mathematics, engineering, geometry and all the archi-related concepts we have mentioned earlier, all of which, we term as architectonics, that make the Delta of Universes. The Whole Creation or the Delta of Universes Is: a: The Absolute Still or Luminous Void, Outside the Duantum Universe; b: The Duantum Universe; c: The De-luminous Void, Inside the Duantum Universe and d: The Matter Universe. And the Matter Universe is comprised of the following: 01: Imagio-Spiritio-Intelligentium; 02: Anima-Intelligentium; 03: Herbo-Sensorium; 04: Matterium; 05. Cosmosium. To fathom the qualities and nature of God or Alphansum we, therefore, must, study Humanity, Hemmanity, Naturium, Rosasensedium, Isabelium and the Mechanoprincipium. For to only try and see God or Alphansum just in humanity is like trying to understand the body of waters on earth by just looking at a lake. In short, the Delta of Universes and everything in them, exist as per the Mechanoprincipium and they all follow the Universal Laws as 'imprinted' in the Mechanoprincipium: And the entire Body of Learning, Knowledge and Wisdom is organised as per the Mechanoprincipium in a Universal Learning Grid from where came from and, forever be coming new ones, all branches of Learning Knowledge and Wisdom: From Alphansum Sovereign Necessarius: To Be Published Soon: Munayem Mayenin

Under the heading of 'Cosmogeogenomodynamics: The First Paper on the Necessity Validity and Urgency of Cosmogeogenomodynamics: The New Branch of Science to Study the Evolutionary Genomic Biophysical Biochemical and Cosmological Impacts of All Forces and Variables Working on the Human Physiology and Psychology', we wrote the first ever text about this discipline and published it in The Humanion and The Humanion Portable Daily on Tuesday, June 16.

|| Tuesday: June 16: 2020: Munayem Mayenin || á. As part of the philosophy and vision of humanics there are proposed and envisioned many new branches of science, learning, knowledge and wisdom, such as, Duantum Physics, Hearteogenics, Beaubrobellogenics, Cosmography, Cosmovicology, Humanical Moral Science, Cosmogeogenomodynamics is proposed as a new branch of a vital science, whose necessity, validity and urgency we are to write and elaborate on this first paper on the subject, which should study the evolutionary, genomic, biophysical, geophysical, biochemical and cosmological impacts on the human physiology and psychology to understand how human physiology and psychology find themselves exposed to an almost-infinite number of geological, earthian, solarian and cosmological forces and variables, which are determining their size, shape, colour, texture and other attributes, as well as, the very size, structure, shape and function of their various physiological organs and systems and working as an infinite source of determinative evolutionary perimeters.

Back in the mid-eighties when this Author was developing the entire basis and foundation of humanics as he was already on the way to find Duantum Physics with which he began his ever-going questioning about darkness as to what it was, that no one did or could answer, including, the fact as to why the entire Universe was infinitely engulfed in an infinity of that darkness, that no one could understand or define, he found the absence of the most vital of all sciences so far the human existence was concerned, the term for which we are using today is Cosmogeogenomodynamics: cosmo-geo-genomo-dynamics. We have nothing as science to bring about this giant of a viewscape and study how human physiology and psychology get impacted by all these geological, geophysical, geo-dynamical, seismological and cosmological forces and variables and how they are not only impacting and directing but, also, guiding an evolutionary constant contra-flow to-and-fro dynamics of functioning, development and evolution for the human physiology and psychology. Why on earth have we not developed this branch of science centuries ago so that we

would now be able to understand these things better and get ourselves rid of all the mythologies, lies, falsehoods, fabrications and political poisonings of hatred, racism or self-loathing, devastating humanity all over the earth. This branch of science would have established the clear pictures so that we could see everything in the crystal clear vision of pure and clear science.

This began following an incident in this Author's life. The dark regressive forces never liked this Author much and in Baangladesh they called themselves vanguards of 'Islam' and they tried to kill him with their physical violence and brutality and he was savagely attacked and disfigured. However, he survived. Until that point, he would get to notice the full moon when it adorned the sky but, were the weather to be gloomy, he would not notice the fact that it was full moon. But following this attack in which his right arm was cut at the middle so that there are stitches and a lot of the blood vessels damaged and a lot of them got narrowed in that area, that causes pain, still now, he began to notice when it was full moon, even, when the moon was not visible in the sky. That was because he would notice and feel a pain, building up in that space of his right arm. It felt, as, if, more blood was seeking to pass through those narrowed vessels and, thus, creating pressures, that felt as pain. That only happened when it was full moon. That's the only way that phenomenon could be explained.

He tried to understand what happened, that caused him to become aware of the full moon. That had to do with the blood. The full moon impacts on the

*The Cheddar Man: Let the Cheddar Man Show and Bring All Humanity At Home With Itself in One As One: As One-For-All and All-For-One: Following 10,000 Years of Evolution Or 300 Generations His Descendants No Longer Look Black But Have Evolved to Look White in This England, in This United Kingdom and Many Other Parts of Europe: This Is the First Time Science Has Demonstrated Evidence of How Humanity Evolves and How It Must Do in Order to Adapt in the Environments It Must Learn to Exist and Survive: Let Racism or Self-Loathing Get Into Dust With Its Lies, Fabrications, Falsehoods, Mythologies, Conspiracy Theories and Obnoxious Supremacy Conjectures and With Its Hatred. We Can, With Certainty, Science and Evidence Now Say That It Takes, at Least, 10,000 Years of Evolution or 300 Generations in a Different Environment Than Where It Has Come From for Humanity to Become Physically Diametrically Different, i.e, That Black May Become Brown or White May Become Black or Black Become White Or Brown Becoming Black Vice Versa. That There Is One and the Same Humanity, That Resides Inside All Different Physiological States and Expressions of All Humanity Across the Earth and All Humanity, the Entire of the Seven Billion Plus of Us Across the Earth, Arises Out of the Same Species of Humanity, Called Homo Sapiens. That's the Only Humanity There Is On This Earth: Cosmogeogenomodynamics Shall Open Up This New Field of Science and Educate, Enlighten and Illumine Us Towards the Illumination With Pure, Clear and Joyful Light of Science: Humanity: We Are One. We Declare As the Father of Cosmogeogenomodynamics: The Cheddar Man of Dornuaraana or the Jurassic Coast of England: England: United Kingdom: Who Existed 10,000 Years Ago*

body of the earth, on the bodies of the waters across the earth, not only impacts on them, it impacts on our body and inside that body there is ample liquid in the form of blood, which can not but react and respond to the full moon and the power it exerts on earth and the forces it brought to bear on things on this earth.

That realisation was the beginning of Cosmogeogenomodynamics. We exist on earth. This earth is an engineering marvel, with its geography, geophysics, earth sciences, geology, geodesy, seismology and more, that enable us to learn how the earth is constructed and how it works and what forces and variables are active there, that impact on all things on earth. Beyond this earth, we see that this earth is a system of Two: the earth and the moon, that is part of the next system, the Solar System, that is part of the system of the Milky Way Galaxy and, that is part of the wider system of the Local Neighbourhood Galaxy Cluster and, then, following that we take the humanical view of the Delta of the Universes and we find there are systems of clusters of galaxies, which all are then arranged in galaxillations, one after another, forming an ever-going nine

galaxillations till the end of the Matter Universe and all that form the wider living-breathing Universal System of all systems and mechanisms. We humans live and exist under all these forces and variables: the geological, geophysical, geographical, seismological, physical, chemical and ecological forces on earth, as well as, this infinite array of cosmological forces and variables and all these forces and variables are exerting their influences on how we exist, develop, grow and evolve. But we have not got the very branch of science, that will teach us, that will show us what are all these forces and variables and how they impact and direct our existence and evolution and how, in turn, our physiology changes, alters, adapts, develops and evolves!

The earth is not a regular sphere: it is rather an unregular shape in reality so that forces on it are spread varyingly in different places: there are heights and there are lows; there are mountain tops and plateaus and there are valleys. There are highlands, midlands and lowlands and there are waterbodies in ponds, lakes, springs, rivers, gulfs, bays, seas and oceans. There are green pastures and hard dry deserts and there are coldest of places and hottest of them and there are in between places and there are tropical places and there are many other types and humanity live on, almost, every possible types of places.

However, because we do not have this branch of science, Cosmogeogenomodynamics, we do not know what happens, if, a human being decides to live on top of the Himalayas and another at the valley of it, at the bottom? The higher-up human will have to get used to and evolve in order to survive with very little oxygen and air and under greater exposure to all other cosmological forces, such as, heat and cold and all other radiations and rays and energies arriving from the heavens and, on top of all that, this human being will find that because the earth's gravity would be weakest on the summit of the Himalayas she:he will have to evolve quickly in order to maintain good health and well-being there in such condition. Without responding to these changed reality and the changes in the variables and their quality etc she:he will have to evolve accordingly in order to keep on going. And in the longer term this person will develop and evolve accordingly. Whereas the one on the valley, would evolve and grow differently than the one on the summit. In the longer term both the physiology and psychology of the summit-person will look and feel distinct than the one at the valley, which will acquire its own distinction. That does not make these two humans two different species: they still belong

to the same humanity regardless of the variations and changes they have acquired because of the necessity to evolve to continue survival.

The same situation arises when we look at humans living and existing on various types of habitats on earth: Siberia, the Arctic, the Antarctic, the Horn of Africa, depth of Chinese mountainous places, depth of Russia, depth of Asia and the middle east and across Europe. On lands and other places where humanity exists and all offer divergence of these forces and variables, as well as, exposures to wider cosmological forces and variables in differing range, duration, frequency and magnitude. All these will impact on the human physiology and psychology and direct human evolution in a desired-for and necessary changes and, eventually, those desired-for and necessary evolutionary changes will begin to take shape and will continue. These do not happen over night but gradually and continue so that generations later the changes become to be impossible to ignore. Take the example of the Cheddar Man, 10,000 years ago, in what would be called Dornuaraana in the long historic past, the Jurassic Coast of England, he was black, 300 generations later we now know for certain that his living off-springs or 'children' are no longer black but white. There are supposed to be an estimated 10% of the UK population to have arisen out of Cheddar Man and his people, who no longer are black but white. That's 300 generations of evolutions under all these variables and forces we are speaking off. This smacks and smashes to dust the lies of 'race' being determined by 'colour'!

However, let us take a look at the earth: it rotates three directionally, like all other objects in the Matter Universe: axial, orbital and outerbital. What are the direct impacts and results of these perpetual three-directional motion of the earth on the inhabitants on it and all other life forms? These three-directional motion can not but have direct, immediate and determinative impacts on how we appear, as well as, the work and impact of the gravitational, geological and seismological forces. The very shape, size, structure and functioning of the human physiology and psychology are determined by these forces working in concert on these bodies of the humans and they will have to evolve in the very way they must for otherwise they will perish away. One can not exist the way one does on the Horn of Africa in Siberia and, likewise, one can not live in Saudi Arabia the way one lived in Siberia. One can not live the way on does in the Mongolian Plateau while in New York.

Add to this the fact that the earth's orbit is not regular spherical in shape but elliptical so that we have the variation of seasons and this ensures that many parts of the earth stays closest to the sun most of the time of the year while other places stay and remain at the furthest away from it so that these two places are exposed to differing range of variables and forces and their abundance, volume, frequency and magnitude.

There are countless forces and variables, that we are exposed to and we must navigate, react and interact with and seek to achieve a 'desired-for' evolutionary path for continued survival. This goes on at all times and human physiology means we are a combination or unified expression of many constructions: genomic, neurologique, cardiologique and biochemical and many others and all of which shall and will change and evolve to what must be achieved as desired-for and must outcomes in evolutionary and survival terms. We evolve fast and we must not make a mistake in that effort because that will mean we shall perish. There is no room for mistake, which will be fatal. We can not send human beings on the Moon or the Mars as we will send them to Johannesburg or Tokyo! They will get fried up there pretty quick on the Moon or Mars, if, they landed there, as, if, they had landed in Johannesburg or Tokyo!

Whereas we know that humanity has perfected this ability, to change, to adapt, to evolve, to, almost, infinity, which is what has ensured the continual survival of the species and which is why and how humanity has become such a large body of persons: seven billion plus of us. Therefore, this paper invites the world and world humanity, particularly, all those, who are into the fields of learning, knowledge and wisdom to rise to begin work in advancing this new branch of science, Cosmogeogenomodynamics because it is vital, it is paramount and it is a must for humanity to develop for we are developing and we must understand these forces and variables and how they impact and change our physiologies and psychologies and how they influence, impact and determine how all our physiological systems work and continue to seek, achieve and maintain homeostasis and the survival of the species. We invite world universities and learning institutions to begin designing and delivering degrees on this new branch of science, Cosmogeogenomodynamics. Let them know that we are going to expand this paper into the first textbook on Cosmogeogenomodynamics as soon as we can find that space, scope and opportunity.

And this opening of this new branch of science Cosmogeogenomodynamics, will be the end of racism and self-loathing for when there is science the lie-concocters, the lie-disseminators, the lie-spreaders and the poison-planters will find no earth to stand on for they stand, grow, fester and thrive on absolute, utter and infinite ignorance.

There exists one species of humanity on earth and it is called Homo Sapiens and the entire earth is covered and populated by the off-springs of this species of humanity, the Homo Sapiens. That is the only humanity there is, that exists and that we all are: black, brown, white, blue, yellow, red and turquoise or whatever else, able and disabled, women, men, children and young people: all one and the same humanity with our absolute and infinite oneness and with all our infinite arrays of all diversities combined. This is an absolute, complete and utter lie, falsehood, fabrication that there are 'races' of different humanity on this earth: white and black and brown and yellow and blue and this and that race! This is utter and absolute rubbish: there is only one species of humanity, existing on this earth and they are the Homo Sapiens and we all are descending from this same origin with the same human genome, with the same human neurology, with the same human cardiology, with the same human biochemistry, with the same haematology and histology, with the same assistantial homeogenesis, with the same breath, with the same blood, with the same beats and rhythms in our hearts and with the same and one human psyche or soul. Ignorance belongs to regressive forces; let all humanity walk forward, being the progressive force, the visionary souls, with the light and luminosity of learning, knowledge and wisdom of science and of human rationality. Humanity: we are one: we are an infinite goodness and righteousness unfolding itself and here is the torch of eternal light, Cosmogeogenomodynamics, to keep on going forth and forward in the dark with the power, with the beauty, with the joy and with the love of what we are: a beautiful thing: humanity naturale. Love all humanity regardless of what their physiologies look like for humanity is made of non-physiological qualities combined, the qualities, so abstract that we can not see or show them: What is love? We can not see it nor can we show it as we can a pen. But we can show Emma and say: "Look! This Emma Woodhouse and this is how she looks; in love with that Mr Knightly and this is how she looks when she spies him walking through that green and she is lost for breath and goes mad as to what to do till he comes in, taking his hat off and

goes: how are the chickens today Emma! I hope the foxes stayed away last night!"

## **Cosmogeogenomodynamics: Munayem Mayenin**

This is the proposed work on the new branch of science, proposed by Munayem Mayenin. This will give the reader a sense of the scope, depth, breadth and magnitude of this new discipline science.

Contents

One: Homo Sapiens: One Unity of Itself

Two: The Making Up of the Homo Sapiens: The Genomic: The Neurologique: The Cardiologique: The Biochemistry: The Molecular: The Electric: The Electromagnetic: The Assistantial Homeogenesis: The Psyche or The Soul

Three: Introduction to Cosmogeogenomodynamics

Four: The Necessity of Cosmogeogenomodynamics

Five: The Scope of Cosmogeogenomodynamics  
Six: The Areas of Study  
Seven: Cosmogeogenomodynamics' Relation to Medicine and Psychiatry  
Eight: Cosmogeogenomodynamics' Relation to Social Psychology  
Nine: Cosmogeogenomodynamics' Relation to Psychology  
Ten: Cosmogeogenomodynamics' Relation to Humanical Moral Science  
Eleven: Discarding the Freudian and Behaviourist False-Schools of Psychology  
Twelve: The Variables of the System of Two: Earth and Moon  
Thirteen: The Earthian Forces and Variables  
Fourteen: The Solarian Forces and Variables  
Fifteen: The Milky Way Forces and Variables  
Sixteen: The Intergalactic Forces and Variables  
Seventeen: The Cosmological Forces and Variables  
Eighteen: Geological Forces and Variables  
Nineteen: Geophysical Forces and Variables  
Twenty: Seismological Forces and Variables  
Twenty One: Timean Forces and Variables  
Twenty Two: Ecological and Environmental Forces and Variables  
Twenty Three: Nutritional Forces and Variables  
Twenty Four: On Genomic Sphere  
Twenty Five: On Neurological Sphere  
Twenty Six: On Cardiological Sphere  
Twenty Seven: On Molecular Sphere  
Twenty Eight: On Biochemical Sphere  
Twenty Nine: On Electrical Sphere  
Thirty: On Electromagnetic Sphere

Thirty One: On Seismic Sphere  
Thirty Two: On Atomic Sphere  
Thirty Three: On Nano Sphere  
Thirty Four: On Nano-seismic Sphere  
Thirty Five: On Nanomammoth Sphere  
Thirty Six: On Nanomammothseismic Sphere  
Thirty Seven: On Assistantial Homeogenesis  
Thirty Eight: On the Soul or the Ecology of the Soul  
Thirty Nine: On Homeostasis

Munayem Mayenin's philosophical works presented the humanical psychology:

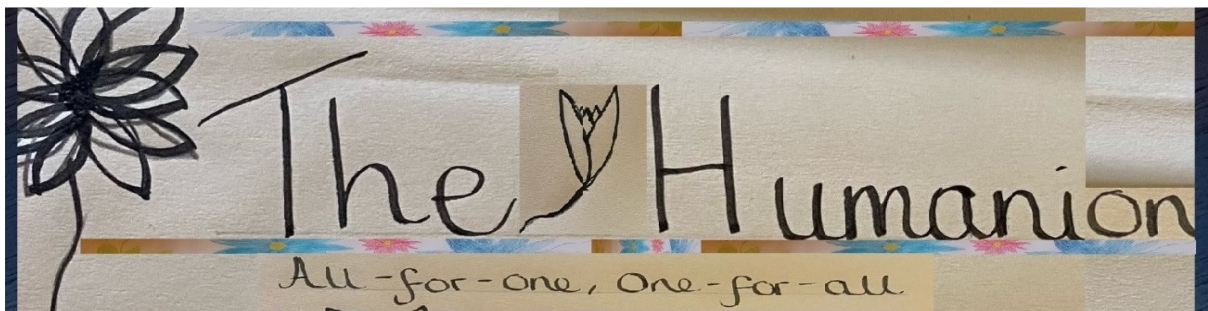

Dehumanisation of Humanity  
Humanics The Foundation  
Humanics The Humaniconomics: The Laws and Lawlessness of Pseudonomics  
Humanics The Humanicovics: The Political Philosophy of Humanics  
Alphansum Sovereign Necessarius  
Maya The Mechanoprincipium  
Humanics Sociology of Evil  
Psychology of Zoohuman  
Duantum Physics
