|| Thursday: April 16: 2020 || á. We, very tentatively and with a great deal reserve, begin to come back to reality and start the resumption of regular publication of both The Humanion and The Humanion Portable Daily with this piece. Our regular readers will have become familiar with the title of Munayem Mayenin's work in philosophy, metaphysics, psychology and social psychology, 'Alphansum Sovereign Necessarius, which, following its nine-step-realm-path of becoming, has reached reality and, has been published as a book on April 14.

The book has been published by in paperback, Alphansum Sovereign Necessarius: Munayem Mayenin: ISBN: 978-0-244-58241-8: 420 Pages: Price: £29: First Published: Imsonium Books: April 14: 2020. The front cover of the book has been done by Ms Jessie May Peters and back cover by Ms Saahia Shoilie Mayenin. "This piece of work has arisen out of a whole life-time of continual seeking answers to, asking and raising questions and continual learning and development." says Mr Munayem Mayenin. "I am thankful that, finally, this

large body of works have reached their final form and shape and is now ready to go to the world.”

“Thesis always arises as a necessary response to already existent antithesis; however, a thesis is, always, translated and transformed into reality not as the thesis but what it becomes, a synthesis, because many a mind get involved in its translation, interpretation, transformation and implementation by contributing to it their imagination, ingenuity and creativity, quality of which is, always, determined by the level, degree and magnitude of their learning, education, illumination, enlightenment and wisdom.” Munayem Mayenin writes at the opening of the book.

“Therefore, Marxism was a thesis of the antithesis of a newly developed capitalism, which, then, got translated, interpreted and transformed into the synthesis by many a mind in the Marxist political agencies, who, then went about implementing it into reality.

Humanics is, therefore, the thesis of the same capitalism, reaching its highest-most developed state by which it has emerged, asserted and established itself as the only system of economics in the world, which it has done by taking humanity to the highest-most dangerous stage, state and magnitude of

dehumanisation, by the creation, sustenance and enlargement of the sociology of squalor, with the development and use of the distorteddia and, through these, enforcing all the high-cruelties, high-brutalities and high-barbarities, arising out of its poverty-paradigm, through the establishment and enhancement of the sociology of evil, which is the highest or, rather, lowest end of the fate, that zoohumanity gets to become, which is the exact opposite of what humanity is as humanity naturale and, included in this capitalism is the entire existence of the failed socialistic and communistic experimentations, as well as, the failures of Marxism as critique of this capitalism.”

“Furthermore, humanics, is a thesis against the antithesis of the whole sorry saga of all branches of sciences, learning, knowledge and wisdom, particularly, with regards to the states of human psychology, sociology, social psychology, absence of vital branches of sciences, moral science, philosophy, political philosophy, political economics and jurisprudence, succumbing to a dead end and the death-strangling of all arise out of the vice-clasp of the Freudian and behaviourist schools of psychology. This is what enables us to a state where we have been made to accept that humanity is what we are now made into:

zoohumanity, so that we are not, even, looking at what humanity is as humanity naturale. Alphansum Sovereign Necessarius is the pinnacle of this body of work challenging all these to invite, inspire, equip and empower humanity to rise to see, elvision and encapture the true feature, state, prospect and vision of that humanity as humanity naturale on these Delta of the Universes, whose existence have been brought to light only by Humanical Metaphysics.”
