

# || EA || The Humanion Ellaarch Launching Soon: I Question Therefore I Learn || EA ||

The Humanion Ellaarch is the newest addition to Regine Humanics Foundation Ltd's publications. Ellaarch is going to be an 'open' journal for research, learning and innovation, presenting all works, efforts, initiatives, projects and endeavours of human imagination, ingenuity and creativity in all areas of life and learning: Sciences, Mathematics, Economics. Jurisprudence, Sociology, Philosophical and Humanities. From Medicine to Neurology to Geo-sciences, from Engineering to Astrophysics, from Political Economics to Sociology, from Astronomy to Archaeology, from Anthropology to Sociology, from Literature to History: the entire human arena of learning, knowledge and wisdom is open to The Humanion Ellaarch. All Areas, Disciplines, Fields, Spheres and Arenas of Learning Will Have Their Own Windows on This Learning Universe of Ellaarch. Ellaarch: Progress is through questioning and learning. Therefore, as humanics does, Ellaarch, with all her sister publications, stand against

capitalism's poverty paradigm, that makes life a punishment and can't-do-regime, that cripples the human existence and the human condition on this earth.

As all The Humanion Group of Publications arise and stand on the vision, philosophy and earth of humanics, our commitment is to stand firm against and fight all forms, manners and expressions of dehumanisations, machinations and mechanisation, manipulations, mobbing, fascisomisation and herding of humanity to advance human intelligence, education, enlightenment, empowerment, development and progression for humanics stands of the foundational premise that humanity is humanity naturale as an infinity unfolding itself and as such it is an Eternal Learner for the illumination, enlightenment and wisdom being brought before the vision of this humanity naturale by the continual advancement and addition of and to the Grid of Learning, Knowledge and Wisdom offers us the Field of Universal Laws, comprising a Colossus Complexus where humanity naturale can not but be Eternal Learner.

All of which relate to i: the primary form of humanity, the individual human person or the individual human agency of the human mind, without which no forms of humanity can exist; ii: the secondary form of humanity, all the institutions, that all the singularities of humanity together create, run, maintain and develop; and iii: the third form of humanity, the combined spiritual, socio-cultural and socio-humanical ecology, created by all singularities of humanity into a unifying into a unified one whole, getting larger in size, scope and influence: families, networks of families, agencies and organisations, communities and, the largest of all, is society. Therefore, Ellaarch will not be interested in the 'fraudficial intelligence', that the market forces and the Distorteddia are seeking to promote as artificial intelligence, which is nothing but machine processed programming and with it they are adding, machine learning, which is nothing but algorithmic machination for profiteering while the very human intelligence is massacred across the earth because education has been denied to a vast multitude of humanity and through the 'starving' state funding of education in, even, the advanced economies of the world, higher education is blocked off from a large portion of the populace and the statutory education's quality suffers so much that, often, a large portion of the young people, attending and leaving it, are failed profoundly by it.

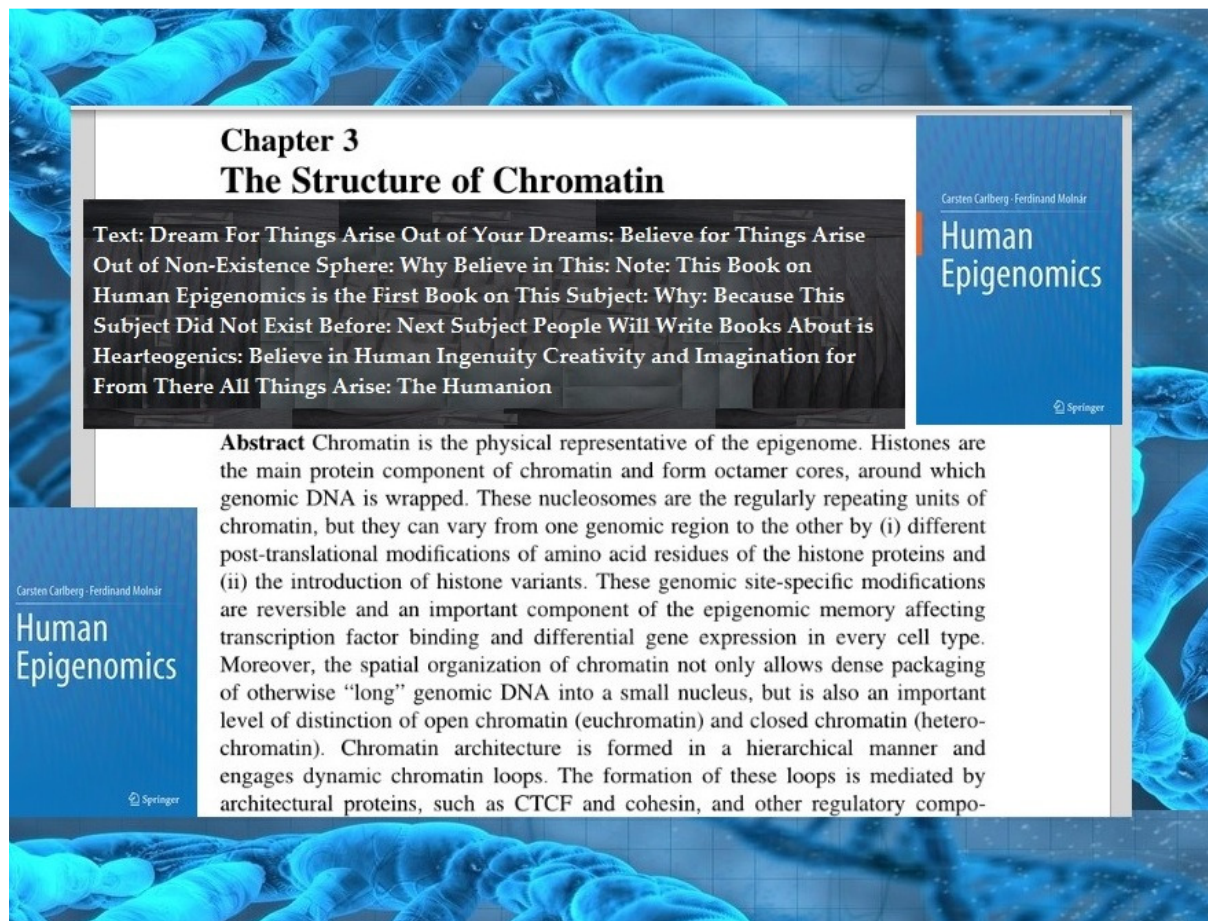

For intelligence exists only in Nature in three natural forms: a: Mechanical Without Mind, by which all the realms of matters, energies, forces, powers, motions, velocities, statics, time and anti-time, matter and anti-matter, space and anti-space and the magnum duantum of the primal darkness and all the architectonics, architectures, mechanisms, systems and processes by which mathematics and all other branches of science, learning, knowledge and wisdom work.

b: As Biogenetical as Biological Bio-Awareness Without Mind, that is found across the vegetation and green ecology of life and across the large and small living animal kingdom, that form hemmanity and microbial and nano-worlds of the miniscule living organisms.

c: And Bio- Intuitional As the Agency of the Human Mind: That is not only biological but, also, intuitional, that can ellevision the existence of The Mechanoprincipium as The Hypothetical Book of All Universal Laws by which the entire Temporal Creation comes into being, exists and perishes by and it can ellevision the existence of the Grid of Creation, The Grid of Learning, Knowledge and Wisdom and it can understand time and anti-time, matter and anti-matter and space and anti-space and can understand existence in time and space and, at the same time, it can understand non-existence as the equivalent of existence in time and space. This intelligence has the capacity and faculty to learn because it has got inside it as inherently constructed the Architectonics of Rationality by which Reason or the Light of Rationality comes into being.

**Eliaarch** will publish materials as they are ready everyday. It is an open voluntary subscription only publication whereby the readers will pay a minimal voluntary subscription payment daily or weekly or monthly or annually or as a one-off contribution. However, it is open to all the public free of charge. The principle of this is simply this: the way we are not going to take food or drink from supermarkets or any other places without paying for them and eat or drink, as, if, we have no issue with the fact that we have not paid for these things, that have been produced by human work and labour. The Humanion Eliaarch is produced, created and presented through this human work and labour, that cost 'resources' of all kinds, which, in a money-based system of economics, have monetary expressions and the readers, therefore, ought to pay for using it, even, if, it is just there for anyone to read free. Because, unless, readers do that, there shall come a point that publications like this will

come to cease and who will suffer the lack of 'lights' in this ever-increasing and ever-widening darkness of the dark powers of large money's manipulations?

*The Subject Human Epigenomics Did Not Exist: Now It Does: This Is the First Textbook on the Subject by the University of Helsinki*

If, we ought to pay for our food and drink, for the houses we live in, the facilities and provisions we use, the educational and other public facilities, the vehicles, the public transport and holidays, then, we ought to pay for the learning resources, that we use to advance our learning and development. If, we pay for the degree course we are studying, if, we pay for the books and learning materials, required for this degree course, if, the lecturers and professors and other academic staff get paid for delivering that course, if, the consultant neurologist gets paid for her:his service and work, if, the fuel is paid for, if, the sandwiches are paid for, haircuts, shoes and ties and shirts and socks are paid for why should we not pay for the most vital of all investments: to develop ourselves through learning and with that development of all of us individually

advances the very society we live in and, thus, contributes towards the advancement of the human condition?

As readers arrive on the website of The Humanion Ellaarch, she:he:they will be invited to the options of payments, from which each will have to choose and make the payment. It is up to the readers to make that payment. However, because it is open The Publication will still be accessible to all readers for free. If, the readers read, use the materials for research and learning without paying they ought to remember that they have made use of these materials, that they did not pay for. In other words, they 'owe' The Publication' for that 'taking advantage of its provisions' without paying for them. It is as simple as that. The readers know whether they have paid or not: there is no other enforcement for we want to keep Ellaarch open to all so that those, who can not contribute can still use the source of learning.

The very research Ellaarch will be publishing has been funded through bodies and agencies and the researchers themselves have been paid for their work, time and research. Why should readers not pay for that provisions of learning, being published in The Humanion Ellaarch or any other outlets?

There is no 'Court' for morality: it is 'enforced' by the human agency of the human mind, that ought to know this: that for anything to keep the human physiology in good state of health and well-being it pays for products, provisions and services so should, so ought it pay for products, services and provisions, that are a pre-requisite to keep its own Agency of the Human Mind in good state of health and well-being because learning is such a thing, that keeps human souls in good nutrition-grounds and developing spheres. This applies so long we are in a money-based system of economics. In humanics it changes into not-paying because there's no money: however, in human enterprise we all work and produce for all from which we all take our share of what we need to fulfil our necessary utilities.

How Much

Daily: 50 Pence

Weekly: £05.00

Monthly: £10.00

Annually: £100.00

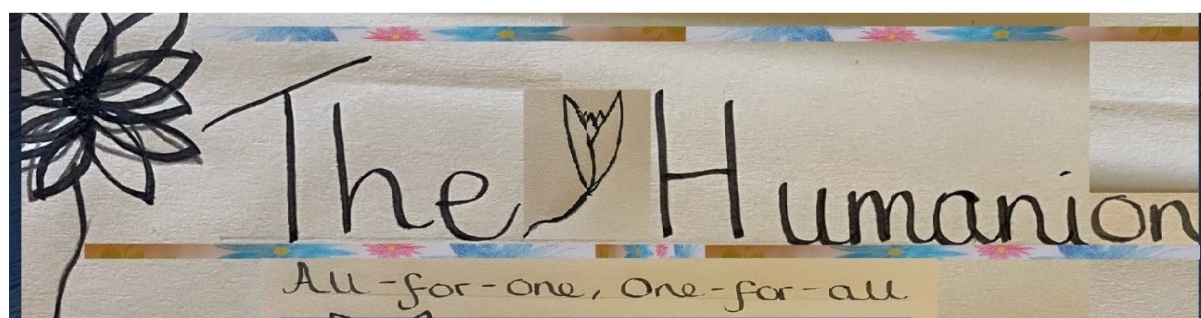

Subscribers will be notified of any new posts as they are posted.

The Humanion Group of Publications, including, Ellaarch, is owned by Regine Humanics Foundation Ltd, which is a not for profit, social enterprise, meaning, no one owns it but itself and from The Foundation no one makes or takes away any profit. All incomes The Foundation makes are used and invested in pursuance of the aims and objects of The Foundation.

The Humanion Ellaarch will be launched soon.

## **The Humanion Ellaarch: I Question Therefore I Learn**

|| Selfishness Is the Most Definitive Way to, Absolutely, Harm One's Very Own Self, As Well As, Everyone and Everything Else: In Other Words, Selfishness Is Nothing But Absolute, Complete and Comprehensive Absence of Questioning or Thoughtfulness or Consideration, Which Makes Us Think and That, Thus, Enables Us to Reach the Rational Base and Foundation in Life and in Existence: This Means That Selfishness, Actually, Is a Terminal Enemy of the Agency of the Human Mind, Which It Keeps on Tearing Away and Apart by Being Devoid of Questioning and Thoughtfulness Because the Very Agency of the Human Mind Is a 'Structure', Created by the Architectonics of the Architecture of Human Rationality, Which Requires a Human Agency of the Human Mind to Put It to Use by Thinking, Questioning, Consideration, Analysing, Learning and Developing, All of Which Selfishness Terminates: Humanics ||
